

Professional Summary

I'm a software engineer with a strong focus on building and delivering scalable web and mobile applications. My background in front-end development and team leadership enables me to work closely with designers, developers, and stakeholders to bring ideas to life through intuitive and impactful user experiences. I enjoy connecting technical execution with real user needs, improving processes, and ensuring clean, efficient, and accessible digital interfaces. With a problem-solving mindset and a collaborative approach, I strive to build products that are not only functional but meaningful and easy to use.

Experience

Software Developer | @Peculiar

Oct 2023 - Nov 2024

- Designed, developed, and deployed a scalable e-commerce platform using React and Firebase, enabling the company's transition from offline to online sales. Focused on building an intuitive interface and seamless shopping experience, resulting in strong user adoption from both customers and internal teams.
- Built a comprehensive admin portal that allowed staff to efficiently manage orders, track inventory, and assign tasks, significantly reducing manual effort and improving operational workflows.
- Collaborated closely with cross-functional teams—designers, developers, and product managers—to ensure technical solutions aligned with business objectives and user needs.
- Monitored platform performance post-launch, proactively identifying and resolving issues to maintain stability, improve speed, and ensure a reliable shopping experience for customers.

Technologies Used: React, Firebase, JavaScript, HTML5, CSS3, TailwindCSS, Git, Figma

Software Developer | @Borderfree

Sept 2021 - Aug 2023

- Promoted from Product Engineer to Lead Developer within a year for consistently delivering high-quality work and demonstrating strong leadership potential. Managed and mentored an 8-member development team, guiding them through technical challenges and ensuring timely project delivery.
- Led the end-to-end development of key products—including both web and mobile applications—working from initial concept and requirements gathering to deployment and post-launch support.
- Worked directly with stakeholders to translate business requirements into actionable technical tasks, ensuring that features addressed real customer problems and contributed to product success.
- Introduced workflow improvements such as CI/CD pipelines, reusable front-end components, and enhanced documentation practices, which sped up release cycles and made onboarding new developers more efficient.
- Collaborated with QA teams and senior engineers to identify, troubleshoot, and resolve application issues, maintaining high uptime and ensuring a smooth user experience.

Technologies Used: React.js, Node.js, Express.js, Redux, Material UI, AWS, Git, Figma

Technical Skills

Languages: JavaScript, HTML+CSS

Web Dev Tools: Redux, webpack, VSCode, Git, Figma, npm

Frontend: ReactJS, NextJS, Material UI, Bootstrap,

tailwindCSS Backend: Node.js, ExpressJS

Cloud/Databases: MongoDB, Firebase, AWS

Education

Full Stack Development: Newton School [MERN]

Graduation: Delhi University BA

High School: Kendriya Vidyalaya, Pushp Vihar
